McGILL LOSES FINAL GAME TO VICTORIAS

Intermediates Beaten by Score
of 5-2

SOFT ICE

Victorias on Form Shown De-
served Victory

In the final game of the Intermediate Series played last night in the Victoria Rink McGill went down, beaten by the Victorias by a score of 5 to 2. Thus Victoria holds the championship of the City League.

A larger crowd than usual were in attendance and much interest and enthusiasm was shown. The hockey was fast and clean throughout but the Victorias always seemed to have the best of the play. Their back checking was very good and were able to break before the forward line could get back at them. McGill was slow in her combination work and many times the Victorias managed to block the passes. Many shots pestered the McGill nets but Moran was usually here. He made many spectacular stops and received the applause of the excited on-lookers.

The first period was quite fast and the play was more or less even although Moat managed to fool Moran and to mount one for the Victorias. McGill tried to even the score and after missing many chances the going went for time.

In the second period McGill got away with a start by tying the score, Frederick hitting in the goal. However they seemed to drop back and in a scrimmage that followed near the McGill goal the puck was knocked in. For the rest of the period the Victorians kept the puck away from their goal and near the end Greenfield got away and with some clear tick-handling and good brain-work foiled the defence and managed to find the inside corner of the net.

During the final period McGill played four men forward and though they put forth a good beginning they could not keep it up. However Kelly managed to add the final score for the Red and White by a clear pass from Davis. McLean the only man left on the defence played a very good game, stopping many rushes which the Vics managed to get away with. When the final whistle blew Victoria had added two more.

STORMY MEETING LAW UNDERGRADS

Co-eds Are Cause of Clash at
Nominations

Angry clashes and stirring arguments marked the meeting of the Law Undergraduate Society yesterday morning. The question at issue was whether or not three nominations would be accepted in which the nominees were three co-eds in the Junior year. It appeared that the three nominations had been signed by the same men and President Johnson ruled that they could not be accepted inasmuch as an individual could sign only one nomination. The ruling of the chairman brought up the question of the constitution and here an impasse was reached.

It appears that the Law students, although noted for their strict attention to details, have neglected to have a constitution drawn up for their Undergraduate society. This point had been brought up earlier in the year and when a committee was proposed to prepare a constitution the motion was unanimously defeated.

When the President made his ruling yesterday he was asked for his authority to make the decision, but, as his questioners could not show anything to the contrary, his decision was allowed to stand on a vote by the meeting.

The nomination was for the Presidency of the society, and the men who had proposed the names were determined not to be defeated in their purpose. They therefore had a joint and several nomination drawn up, whereby the names of the three co-eds were placed on the same sheet and only required a single signature from each of the men. Much to their disgust, the President once more ruled that the nomination could not stand as it was not in the proper form. The meeting had adjourned before any other method could be thought of but it is understood that they are making plans whereby they will outwit the head of the society.

Other business at the meeting included the consideration of the date for the annual dinner of the Law Undergraduates. It is probable that it will be held on the twenty-first of the month and plans are being made whereby it will be the equal of many of its famous predecessors.

PROF. WILLEY LECTURES ON ANIMAL LIFE

Instructive Address Before
Natural History Society

ILLUSTRATED

Evolution of Animal Life
Discussed

Professor Arthur Willey last evening gave an exceedingly interesting address illustrated with lantern slides on "Evolution and Animal Life." He said that the theory of evolution was such a tax on the imagination that some people have no use for it.

There are three steps in evolution: Ontogenesis, with which is connected the name of William Harvey who discovered the circulation of the blood, Biogenesis, and Phylogenesis with which are connected the names of Francisco Redi and Charles Darwin. Ontogenesis is the life history of the individual, phylogenesis is that of the race.

The structure of embryos points to a common aquatic origin. Natural selection improves by struggle, artificial selection operates without struggle. The wild boar in the jungle is the fittest survival of the family, while the fattest kind of porker is the survival of selection without struggle.

Passive struggle operates in some cases such as that of the beaver and the muskrat. The beaver avoids man, the muskrat clings to its haunts in spite of him, long after the beaver has departed.

The horses in the Pleistocene period were replaced by rodents and edentates in South America.

Natural selection creates, preserves, destroys.

Darwinism is not synonymous with Evolution but is rather the theory of natural selection. Darwin successful overcame the theory of the fixity of species. Professor Willey pointed out very successfully that Darwin did not repudiate any of his theories at his death-bed, as some stories would lead one to believe, whose only redeeming feature is their untruthfulness.

Francisco Redi two centuries earlier than Darwin with a few simple experiments was able to show that life begets life.

Professor Willey showed some very interesting slides illustrating his subject matter. One picture of the larvae of fishes swimming with wide-open mouth and catching all that lay in their path was accompanied by the remark that it was not the fitness but the chance of position that protected the small crustaceans.

(Continued on Page 4.)

"DAILY" MEMBERS

If there are any men on the present staff of the McGill Daily who do not intend to continue their connection with the paper next year, they are asked to send in word to this effect not later than noon, Monday, March 13. This course is being taken to facilitate and to make more definite arrangements for promotions from among the reporters, and it is hoped that the members of the staff will co-operate by complying with the above request.

Communications should be addressed to the Managing Editor and deposited in the letter box on the door of the Daily office.

SNOWSHOERS AND SKIERS AMALGAMATE

Two Clubs Will Operate
Under One Head

LESLIE PRESIDENT

Election of Officers and Prizes
Presented at Meeting

The McGill Snowshoe Club will shortly amalgamate with the Ski Club and the two will operate next year under the one executive. This was decided at the meeting of the Ski Club held last night in the Union, at which were also present most of the Snowshoe Club Executive.

The meeting was called to order by Don Foss, the President, and the minutes of the last meeting read and adopted. Foss then proceeded to discuss the question of the amalgamation, showing that it should be to the advantage of both clubs, as their activities were linked so closely together. Simpson, of the Snowshoe club then announced that at a meeting of his club held recently, they had expressed themselves unanimously in favor of joining with the Ski club.

It was then moved and carried unanimously that the Snowshoe and Ski clubs amalgamate. The executive of the Ski club was left to carry out the revision of the constitution, which is to include the office of "Second Vice-President," who is to be a Snowshoer. Duncan Anderson moved that the President of the Snowshoe Club be empowered to work in conjunction with the Ski executive in framing the new constitution, the motion being carried.

The presentation of the prizes won at the Dartmouth and McGill carnivals then took place, Don Foss officiating.

In presenting his Annual report of the Clubs activities, the President first touched briefly on the keen blow felt by the club in the loss of Norrey Owens, who was seriously injured early in January and forced to resign from the Presidency. He then proceeded to review the work done during the past season. The new jump was completed and opened early in January, and the Inter-Faculty meet was held, but the weather conditions prevented the holding of the Proficiency test. The Club lost the Dartmouth Carnival by two points and were beaten in the McGill carnival by nine points, both events being very close.

(Continued on Page 3.)

DECORATIONS UP FOR ALMA MATER

Last Prom. Replete with Ef-
fects, Music Par Excellence

The decorations for the last and long to be remembered formal prom. are all ready for an evening of sheer enjoyment. They are simple but tasteful. The Orchestra will be enshrined in a bower of red and white, and red and white tissue contributes largely to the scheme of decoration. Flags of ample dimensions are gracefully hung so as to soften the outline of the corners. The floor has an imitable polish that reflects in double the colourful draperies of the walls.

Paramount of course is the music. The McGill augmented orchestra will render haunting melodies that, whenever heard will recall to mind a wonderful night spent at the Alma Mater. The programme comprises the newest pieces and is embodied in a cover of surpassing artistry.

The catering will be worthy of a long line of successful Proms and the supper will be held in two sittings. Two extras will be played for each half. The sitting out places are the cosiest ever.

Altogether, the enthusiasm of those who are going, and the complete arrangements of the committee in charge point to a most successful affair. All that remains now is for the ballroom to be filled with the gaily dressed ladies and their partners to complete the scene. The men are specially requested to sign their own name and that of their partner in a legible manner so that the horrors of mis-spelled names may be thereby avoided.

The memory of messenger dogs that served on the battlefields of Belgium and France is to be perpetuated in a monument to be erected in the canine cemetery at Hartisdale, New York. The monument will consist of a war dog of bronze, in heroic size, with helmet and canteen. It will stand on a boulder overlooking a motor highway and a bronze tablet will bear a legend reminding posterity of the dog's part in the World War. The Hartisdale Cemetery covers four acres and contains hundreds of headstones, vaults and monuments to mark the resting place of pets.

MONTREAL, FRIDAY, MARCH 10, 1922.

THE GAMES OR THE CHAMPIONSHIP.

The decision of the college teams not to take part in the elimination games for the purpose of deciding the Dominion championships has caused the usual amount of comment. It is argued that they should complete their season's activities by playing off with teams from other parts of the country, and thereby determine which of them is the strongest.

There are two or three cases in which the point has arisen. The basketball team, after winning the intercollegiate and city championship, refused to proceed any further towards the goal of the Canadian title. A somewhat similar problem faces the intermediate and junior hockey teams, both of whom may be called upon to enter a long series of eliminations if they continue to win their games. As far as the Juniors are concerned, they would have to travel to Winnipeg if they were fortunate enough to survive the semi-final contests.

As far as the question of participation in country-wide eliminations by the intercollegiate champions is concerned, it has been definitely settled long ago; they only enter at their own option. Another aspect of the problem has to be faced when a McGill team carries off the championship in one of the city leagues. Here the ever-ready critics advance the opinion that the default of the college team to enter the championship contests is, in reality, a default by the whole district which the team represents, and the local reputation suffers as a result. Of course, the criticism will not affect the attitude of the university athletic authorities; they will never consent to having sport take precedence over academic work. There is, however, no valid reason why the teams should be criticised adversely for their decision to stop playing when they have reached the point desired by themselves.

Any league in which McGill enters a team is supposed to be strictly amateur, which presupposes that the players are taking part in the games purely for the love of the sport. It is hard to justify criticism of the players when they place their more serious activities before the teams which they have joined for the purpose of recreation. There is just a tinge of the professional aspect to the long series of play-off games held in every branch of sport, with the consequent large attendances of spectators and big financial returns. Being a member of a team that has attained the championship of a league very often entails the absence of the players for weeks while they are travelling thousands of miles to meet competitors. There appears to be just a little too much importance attached to the championships at stake, and not enough to the sport itself.

The system of the American universities, whereby each university arranges its own schedule of athletic contests for the session, has many points in its favor. There is no league and the games played are final, whether or not a decision has been reached concerning the respective abilities of the competitors. This obviates the necessity of post-season games, and guarantees that the activities of the athletic organizations in the universities will be concluded at the time determined upon at the opening of the session.

Whatever system is adopted, it must always be remembered that the athletic activities of the students are always to be given a place secondary to their studies. The men enter into competition with other teams with a definite end in view, and they will not allow pressure from outside the college to cause them to change their plans. If it were possible to devote the entire activities of the college teams towards the intercollegiate competitions, that would be the most desirable state of affairs. Plans have been announced for next season whereby the hockey and football clubs will enter teams only in the intercollegiate leagues. It is to be hoped that it will be possible for the other branches of athletics to follow the example of the major sports, so that the everlasting criticism may be stopped.

McGILL LOSES FINAL GAME TO VICTORIAS

(Continued from Page 1.)

counters to her score thus winning the Intermediate City League Championship. The full particulars of the game are here below:

First Period

McNaughton got away with the puck carried it down but in a pass Victoria blocked and got away. Moran stopped shot. Davis got hold of puck by a nice pass from McNaughton, he shot but failed to score. Victorias came back relied on a long shot but again Moran turned it aside. For a time Davis and McNaughton kept up some clever combination work but were unable to find the inside of the nets. Ross was tripped and received a hard knock on his head as he fell. He was carried off but was able to continue after a few minutes rest. Soon after Kelly was put off for sending a man through the air. While he was off Moat shot from outside of defence and scored the only goal of the first period.

Victorians worked hard for another goal and in their endeavour to fool Moran one of their players tried a little cross-checking but went to the bench to serve his penalty, then gong rang. Score: Victoria 1, McGill 0.

Second Period

After two minutes of hard work Frederick scored for McGill. Score was now one all. McNaughton nearly scored during scrimmage in front of Victorias' nets. Vics then got away and for most of the period kept puck around the McGill goal. Greenshield managed to stick-handle past the defence and add a second counter to Victorias' list. Red and White worked hard and several times the forward line tried to get past the defence but in doing so Shearer got away and with a shot outside of defence again fooled Moran. Period ended, Victoria 3, McGill 1.

Third Period

McGill played four men forward and left McLean back to guard the net. Again "Shag's" consultation during half-time put a little "pep" into the players and inside of five minutes were able to score Davis passing to Kelly who was able to find an open space. McLean was then called upon to stop a rush which he did well. McNaughton missed chance to score. Vics came back and were again able to find the soft spot in the net. Stephen received pass from Ross but failed to score. In a minute to play Moat added the fifth goal towards the championship. Score: Victoria 5; McGill 1.

The line-up was as follows:

McGill	Victoria
Forwards	
McNaughton	Shearer
Frederick	Moat
Ross	Kent
Defence	
McLean	Adair
Davis	Greenshield
Goal	
Moran	Huff
Subs.	
Stephen	Darling
Kelly	Davidson

By this defeat the Intermediates terminate their hockey for this season. The Seniors have already done so but there is still chance to see the Juniors, now champions of the City League, play with Lower Canada next Saturday afternoon for provincial honours. If successful they then are supposed to go to Toronto and if victorious there, then journey out West and play in Fort William and Winnipeg for the Junior championship of Canada.

PEPYS AT McGill

Thursday, March 9th. This day again to the colleges, and there it would seem as if all the dons who are wont to weigh me down with the burden of their discourses are afflicted by some strange malady engendered of the Spring ayre, for none there were to trouble me this day at the first, and so down with my good friend, Mr. Hark, and into a kind of tavern in the Lower Towne, where I did taste for the first time of a very excellent sort of turgid bitter ale, which comes to them done up in great caskes, and so thick and full of body it is, that a man might almost place a ladle upright there in without danger of its sinking. Back and into the Union a little after noon, where gazing up the stairs toward the Grate Hall I beheld there certain ones perched on the very verge of slim ladders, from the extremes of which they did bind festoons of coloured stuffe about the colonnades. Very weary to bed.

Great Opportunities

We are offering in various departments many lines which we are discontinuing.

Such lines, which are of the highest quality, are offered at a reduction of from

25% to 50%.

SOVEREIGNTY AS NOW UNDERSTOOD

Subject Was Discussed in Politics Lecture

"Sovereignty" was the subject of the lecture on politics delivered yesterday afternoon in the Chemistry Building. The lecture was given by Mr. Hankin, as Warwick Chipman, K.C., had not yet sufficiently recovered from the breakdown his voice recently suffered.

The subject of sovereignty is a vast one. It could not be covered in detail in the course of a lecture. The purpose of the lecture was to give an outline of the subject and to suggest further material for study.

What is sovereignty, where does it reside, and what are its functions? It is these questions that a study of the subject will answer.

In ancient times sovereignty was vested in one person. Whatever he did was right because he was supposed to be divine. Gradually the powers of the monarch were reduced and became vested in the State as represented by a popular parliament. This does not mean that parliament as such is less supreme. While in office it has the power to legislate for the people in matters which may please them or not. It is true that the legislation of parliament is subject to the criticism or the citizens, who can express their approval or disapproval at the next election, but while in power the elected representatives of the people are supreme and in them rests the sovereignty.

Sovereignty can only be supreme when there are no other bodies acting in complete independence. The question then arises how do bodies such as trade unions affect sovereignty? These bodies can act with authority, and unhampered by restraint, only when they serve the ideals of the purpose for which they were formed.

The speaker suggested several books for the further study of this subject.

There will be no lecture in this course next Thursday. The final lectures will be given on March 23rd.

There are no snakes in Bermuda.

A six-pound mackerel is capable of producing 1,500,000 eggs at one time and a 77-pound cod produces more than 9,000,000 eggs. A 23-pound pollock, of the cod family, produces 4,000,000 eggs at one spawning.

Liggett's All-Cream Ice-Cream

Ice Cream, when properly made is one of our most nourishing and wholesome foods. Liggett's Ice Cream is all of that and is made under the strictest sanitary precautions from pure cream, best granulated sugar and pure fruits, in our modern day-light factory. Liggett's Ice Cream is obtainable at our Soda Fountains and Tea Rooms, also in pint bricks to take home and give the family a treat.

ARTS STUDENTS TO HOLD DINNER

Tickets Now on Sale for Annual Affair

It is hoped that all intending to go to the Arts Undergrad. Dinner taking place in the Ritz-Carlton next Thursday, March 16, will make their intention known as soon as convenient by purchasing tickets from the presidents of the various years, or from the Janitor of the Arts Building, at the first opportunity. By so doing they will greatly facilitate the work of the executive in the completion of plans for this function. The more definitely the number is estimated, the more certainly can arrangements be made. The price is two dollars—a considerable reduction from last year's charge.

STUDENTS SOCIETY MEETING MARCH 15

Presentation of Students' Council Report for Year

The semi-annual Students' Society meeting will be held next Wednesday morning, March 15, between the hours of 10 and 1. This meeting is for the purpose of the presentation of the annual financial statement of the Students' Council, in which are incorporated the separate reports of each club and society, etc. Also any business to be transacted will be done at this time, and also the election of officers of the minor positions on the executive of the various athletic bodies such as the Track Club, Hockey Club, etc.

In order that all students may have an opportunity of attending this meeting, lectures have been suspended from 10 a.m. to 1 p.m., as stated in the Registrar's notice contained in another column.

This banquet is an annual affair. This session, following last year's example, it is being held in the Ritz-Carlton; also following the precedent set last year, the menu and the toast list are both of the higher calibre.

ly contested. In conclusion the President said he was looking forward to a very successful season next year.

The election of officers for the coming year then took place. Mr. Herbert Molson was unanimously elected Honorary President. O. Leslie, R. Whittall, and C. Ramsay were nominated for President and Leslie was elected. R. Whittall was then elected Vice-President, C. Ramsay was elected Secretary, Duncan Anderson was elected Manager, and Ed. Sherrard, Treasurer. The several Faculty representatives were then chosen. J. Lane being elected for Arts, R. Ware for Medicine, W. F. MacKlaier for Law, and Smith for Science.

Oliver Leslie, the new President, then

took the chair. He spoke of the coming season, and said that the system of classification of the members into "Novice," "B," and "A" classes would be continued and that men would be moved up as soon as they had qualified.

The question of electing a man as "attendance taker" then came up, but it was pointed out that the Club executive was already very large, and that this might very well be left to their discretion. The meeting then adjourned.

The lecturer on health had finished his discourse and invited his audience to ask any questions they chose concerning points that might seem to need clearing up, when a tired-looking man inquired anxiously:

"Professor, what do you do when you can't sleep at night?"

"I usually stay awake, although, of course, everybody should feel at liberty to do otherwise. Are there any other questions?"

NOTICES

MACCABAEAN CIRCLE.

The next meeting of the Study Circle of the Macabaeans will be held in the form of a Bible Study Class on Sunday, March 12, 8.15 p.m., at 106 Marlowe Ave., Notre Dame de Grace. Dr. Abramovitz will conduct the discussion. All interested are cordially invited.

AERIAL LEAGUE.

On Thursday, March 16, at 5 p.m., in Room 33, Mr. Wilson, Secretary of the Air Board, will deliver to the Science Undergraduate Society a lecture on aeroplane construction. Mr. Wilson is well known to all flying men and this lecture will be one of great interest.

PULP AND PAPER.

There will be a meeting for all those interested in Pulp and Paper on Friday, March 10th in room 2 Chemistry Building at 5.15. Business to discuss and adopt a constitution and elect officers for the coming year.

Will the person who found a "Sherrington's Mammalian Physiology" in the locker-room of the New Medical Building on Monday, Mar. 6th, kindly return same to S. L. Harris, Med. '25, or to Mr. Crawford, the porter?

ARTS DINNER.

Tickets for the Arts Undergrad. Dinner on March 16th, are now on sale and may be obtained from class presidents or the Janitor of the Arts Building.

S.C.A. MEETING.

The Annual Meeting of the Student Christian Association of McGill University will be held in Strathcona Hall, Monday, March 13th, at 7.30 p.m. All members of the University are welcome, and members of the Association are especially urged to be present.

PHYSICAL SOCIETY.

The next meeting will be held in the Macdonald Physics Building on March 10 at five p.m. The subject to be discussed is "The Lewis-Langmuir Atom," the lecture being delivered by Dr. F. M. G. Johnson.

The Nominating Committee appointed by the Board of Directors of the Student Christian Association of McGill University, have nominated the following for the Board of Directors, 1922-23: President: H. R. C. Avison.

Directors: J. B. Ross, E. C. Amaron, Robt. Ogilvy, Stanley Read, W. Hutton, B. Robertson, A. S. Ross, Jack Bieler, Norman Egerton, Chas. Davis, H. N. B. W. Mitchell.

ARTS SENIORS.

Seniors in Arts are reminded that arrangements have been completed by which they can have their graduation picture taken at Notman's. These must be ready by March 10.

CLUBS AND SOCIETIES

All clubs and societies which are to have their pictures in this year's Annual are requested to hand in their write-ups immediately, otherwise insertion cannot be guaranteed. These write-ups are to consist of three hundred and fifty words and are to be accompanied by a list of the executive, arranged in the order in which they appear in the picture.

HARRIER'S INDOOR TRACK.

Former and prospective Harriers would do well to turn out to the indoor Track practices on Wednesdays and Fridays at 6 P.M., in the Montreal High School Gym, in order that they may get into condition for the outdoor runs which will be held, as last year, as soon as the snow disappears.

CANADIAN INTERCOLLEGIATE RIFLE ASS'N.

The second competition, (Gallery, 303.) will be held Saturday March 11th at the 'Vic's' Armory, Cathcart St. Time 2.30 P.M. Those trying for the team will meet at the Q.M. Stores, Physics Bldg at 2.15 to draw rifles and ammunition.

W. H. Bagg, Lt.
Musket Officer.
McGill C. O. T. C.

NEWS BOARD MEETING

A full attendance is requested at the Daily News Board meeting called for Monday, March 13, at 7.15 p.m.

ATTENTION, MEDS!

KING COOK CORONATION
Don't forget to keep Wednesday night open. King Cook Parade leaves the Union at 7.30 sharp. Every man in the first two years is wanted to take part in the parade. Sophomores will wear white coats and follow directly behind the float, while the members of the first year will bring up the rear. As the number of tickets on sale is limited, it is advisable to purchase immediately. The representative in each year has a supply.

INTERMEDIATE "A" BASKETBALL.

A game has been arranged for Saturday afternoon, March 11, with Macdonald College at St. Anne's. Train leaves Grand Trunk station at 1.30 p.m. Any member of Intermediate "A" who cannot take this trip please notify Capt. Schwartzman. There will be no practice Friday because of this game.

SWIMMING CLUB.

The last meeting of the club will be held this afternoon at 5.15 in W. Laishley's room at 851 University St. Business is election of officers. All who are interested in the club are asked to be out.

McGILL C.O.T.C. ANNUAL INSPECTION

In view of the Annual Inspection, every officer, N.C.O. and man should be on parade next Tuesday, March 14, at 7.30 p.m. Dress, drill-order, field-service cap, rifle and bayonet. The Annual Inspection will take place on Tuesday, March 21, parade 7.30 p.m.

RESERVE OFFICERS' CUP

This cup with other prizes is being awarded on the strength of scores made at the firing of the musketry classification, which is being continued on Saturday, March 11, at Craig St. Armory under Lieut. F. S. Lawrence, Classification Officer. Those who have not fired should parade at Q.M. Stores on Saturday, March 11, for issue of rifle.

MANDOLIN CLUB

Those who intend going to the dinner on Tuesday night will facilitate arrangements if they let the executive know before the end of this week. Call Fraser, Uptown 1043, or Harris, Uptown 9130.

MECHANICAL CLUB

A double header is planned for Saturday afternoon. All interested meet at the Union at 2 p.m. to go first to the Purity Ice Cream plant on Mountain street, and then to the Point St. Charles works of the Dominion Glass. Any men who wish to go straight to the Purity Ice should wait outside till the party arrives.

SENIOR BASKETBALL

Players are requested to turn in their uniforms to the manager as soon as possible.

MEETING OF STUDENTS' SOCIETY

On account of the semi-annual meeting of the Students' Society, lectures will be suspended in all Faculties from 10 a.m. to 1 p.m. on Wednesday, the 15th instant, in accordance with the regulation of Corporation in this connection.

J. A. NICHOLSON,
Registrar.

COMMERCE ELECTIONS

On Wednesday evening a meeting of the Commercial Society will be held in the Union. The meeting will be held for two important reasons: first, to hold the annual elections; and secondly, for the purpose of having

NEWFOUNDLANDERS ANNUAL BANQUET

Union Is Scene of Enjoyable Reunion

The Newfoundland Club held its Annual Dinner last evening in the Union, attended by a large enthusiastic audience. Dr. Hatcher proposed the toast to McGill, and was followed by Prof. Stephen Leacock with his usual good wit and humour interspersed with more serious thoughts.

The toast to Newfoundland was proposed by Dr. Crowley, whose pleasant reminiscences of earlier days proved most enjoyable to his audience. Mr. Whitten President of the Newfoundland Society of Montreal replied to the toast to Newfoundland, and spoke of her war record.

The toast to the Graduates was proposed by Cashin, Med. '23, and replied to by R. H. Lemessieur Arts '22; C. F. Davis, Arts '22 and C. B. Fox, Med. '22. The evening finished with a hearty McGill yell. This dinner brings to a close the third year of the Club's existence at McGill, and the Executive are to be congratulated on the success of the past year.

Purchase of seven tracts of land in Europe for permanent American cemeteries was recommended recently by Secretary Weeks.

Johnny had been using some very unparliamentary language, much to his mother's distress.

"Johnny," she cried, "do stop using such dreadful expressions. I can't imagine where you pick them up." "Well, mother," replied Johnny, "Shakespeare uses them." "Then don't play with him again," commanded his mother; "he's not a fit companion for you, I'm sure."

a full discussion of the course. All men interested in the course are urged to attend.

R.V.C. UNDERGRADUATES

The members of the R.V.C. Undergraduate Society are reminded of the invitation extended to them to attend the meeting of the Alumnae Society in the Common Room at 5 o'clock this afternoon. Without doubt the addresses dealing with vocations which are open to university women will prove most interesting and beneficial to all the Undergraduate body.

R.V.C. SENIORS

All members of the class of R.V.C. '22 are reminded that they must have their Senior picture taken as soon as possible, not later than the week of March 13.

WHITES WIN FROM STAFF AT BASEBALL

McGill Squad Shows Vast Superiority to Macdonald Staff

SCORE 21—3

Philpotts Plays Unusually Fine Game for Winners in Box

In a baseball game which proved listless after the first few innings, due to the superiority of the winning team, McGill Whites defeated the Macdonald College Staff by the score of 21-3.

The McGill team took the lead in the early stages of the game by bringing four men across the plate, while the visitors were unable to tally. This was largely due to the excellent pitching of Philpotts who pitched an unusually fine game. Summerby's pitching for the Staff was quite good, holding the home team to no hits on some occasions, while at other times he allowed several.

After the first inning the play was fairly tight, until the sixth, when seven runs were marked up for the McGill team and again in the eighth inning when the winners scored six more.

Peacock, the McGill catcher, was the heaviest hitter of the evening, securing several two and three base hits, and scoring four runs, while Philpotts and Moore each tallied three times.

Summerby played a good fielding game for the losers and on one occasion managed a difficult catch when there were two out and the bases were full. Dreger of McGill proved a dangerous man to Ness, the Macdonald catcher, the latter on two successive occasions stopping four tips off the former's bat with his right eye. He, however, continued to play and accounted for one of his teams three runs.

Another Macdonald man was unfortunately struck in the face by a ball, the latter breaking his glasses, but he luckily escaped injury.

Prof. H. Barton and Patterson-Smythe umpired, both giving good quick decisions in close plays. The teams were as follows:—

McGill Whites Mc-Don. Staff.

Philpotts Summerby

Peacock Ness

Wight Raymond

Moore Heslop

Dreger Amaron

ANOTHER WIN FOR McGILL RED TEAM

Macdonald Students Defeated in Fast Game

In a fast and close game of Indoor Baseball played last evening at Macdonald College the McGill Reds finally emerged the victors over Macdonald students by the score of 18-12.

McCullough was on the mound for the Reds and together with his catcher Bronson made an invincible battery. Outside of the first inning when five runs were scored due to loose fielding, Mac settled down and pitched brilliant ball.

Capt. H. Gaboury on first got everything within reach and a ball has got to be pretty wide before he can miss it.

Norm. Wallace and Bob Hall besides fielding errorless ball both made sensational catches which went for a double play each time saving runs when the game was close.

Snow-flake Lynch held down a new position, third base this time instead of second and made good when needed. Jack spent a lot of time in hockey this year, but he has not forgotten his old ball playing with last year's City Champions.

Campbell, Lanther and Henry connected with some heavy hits at needed times, and the team as a whole batted well.

Skinner pitched beautiful ball. He has been doing consistent good work all year and is one of the star pitchers in the league as well as one of the finds of the season. Dimmock his catcher assisted him admirably and great credit is due to him in holding such fast curves.

Brighton, Templeton and Winter gave a grand exhibition of fielding and pulled their team out of several bad places by brilliant fielding.

Atwell, Jamison and Smith collected a number of hits and kept the red team on their toes most of the time trying to stop the fast ones.

The teams lined up as follows:—

McGill Reds McGill Whites

Bronson Dimmock

McCullough Skinner (Capt.)

Gaboury (Capt.) Templeton

Grasick Conklin

Puddicombe McQuat

McLaughlin Danarte

Radway Hodge

Langtry Spares

Nairn

PROF. WILLEY LECTURES ON ANIMAL LIFE

(Continue) (See 1.)

The giraffe was a most interesting case. It is a survival of a species evolved for the special purpose of feeding off lofty trees. The vertebrae in their neck are seven in number, the same as in ordinary mammals. The giraffe is the best example of the nearest approach to arboreal life that the hoofed animals have ever come. It is a most harmless animal, but at times if necessary can kick a lion to death. The okapi is thought to be the descendant of a nascent giraffe and in the miocene beds of South America a strange parallelism has been found—the fossilized remains of a high browsing giraffe camel.

The nanutius, that is found only in the South Pacific was once widely distributed but it is a descendant from earliest times practically unchanged.

The insects offer exceptional examples of evolution. The leaf-imitating insects and butterflies are two outstanding examples, but the most remarkable is that the female butterfly, who imitates the marking of a variety distasteful to birds.

The ants and termites, the former related to the bees, and the latter to cockroaches have paralleled each other in development. Both have highly organized community life, the termites having soldiers, workers, the queen and the winged male. The ants are said to have slaves.

The parallelism is seen in the farming propensities of the insects. The termites or white ant as it is called creates a spongy substance of masticated wood on which are grown fungi, which form the food for the colony. The leaf-cutting ants of South America are known to do the same thing. This is a case of parallel development of widely divergent species.

The successive strata of fresh water lakes show an evolution in the formation of shells. Another shell, however, called a living fossil or persistent type, remains today as it did in earliest time. This is the Lingula of China—fossil shells of which are found in England.
